

I drive for my livelihood and any traffic or weather delays cost me money and add stress to my day. XM's instant traffic and weather reports are GREAT! I will alter my route when needed to maintain productivity and eliminate exposure to dangerous situations. Sometimes I can't wait for the top or bottom of the hour for regular radio to maybe put out a report as to conditions ahead. I insist that the FCC reject NAB's petition 04-160. Is this not the same as me receiving information on cable TV rather than what I would get from "free TV" that I would receive from an antenna? I pay for what I receive on XM. I will be contacting my representatives on this issue and will monitor Washington D.C.'s response. Thank You.
